

GoVenture Online :: Instructor-Managed

1

Instructor creates a New Account using a GoVenture Subscription Key, or logs in using an existing account. Instructors are provided "Simulation Manager" privileges.

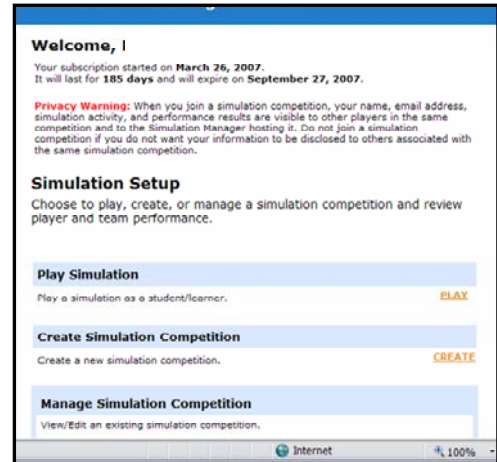

2

Instructor creates a New Simulation Competition.

Simulation Numbers for this competition are generated for the Instructor to give to students. The maximum number of unique Simulation Numbers that can be generated is equal to the number of Student Accounts purchased with the software license.

Instructor gives one unique Simulation Number to each student that will play GoVenture. Simulation Numbers should not be shared amongst students (unless they are playing in teams). Instructor directs students to a special website address to play GoVenture.

3

Students use their unique Simulation Numbers to play the simulation.

The first time a student plays, she is prompted to enter a password and her name. This information will be saved and used to identify the student's performance. From now on, to play GoVenture, the student must always enter her Simulation Number and password.

A student, while playing GoVenture, can post her Performance Report for the Instructor to view and evaluate from the Instructor's login.

4

Instructor can view each student's Performance Report for evaluation and grading purposes.

At any time, the Instructor can end a Simulation Competition and start a new Simulation Competition. At that time, all student Performance Reports and Simulation Numbers from the previous competition are automatically erased. The Instructor may choose to allow the same or different students play the new Simulation Competition.

Student Accounts can be reused an unlimited number of times over the duration of the subscription.

SAVING A SESSION *

A student can save her session at any time while playing GoVenture. The session is not saved online. Instead, it can be saved to any local or network drive accessible to the student. Saving is accomplished similar to most computer programs. A file window is displayed allowing the student to choose a name and location to save her file. To resume a session, a file window is displayed allowing the student to choose a file to resume.

* Applies to GoVenture Micro Business, Small Business, Financial Literacy, Personal Finance, Investment, and Stock Market. GoVenture Big Business Marketing and GoVenture World save sessions online automatically.
